Energy technology to effectively contribute to the energy transition journey

Providing power and heat in a reliable, affordable and sustainable way in a world of rising energy demand requires a complex journey - and technologies that can be combined to shape a new energy landscape. Addressing these challenges is imperative for the energy sector and energy-intensive industries to achieve decarbonization and contribute to global climate goals.

Discover our innovative products and solutions: from low- or net-zero generation of power and heat generation, to reliable transportation and distribution of electricity in resilient transmission grid to all products that support increasing efficiency and decarbonization of the industry. Our comprehensive portfolio helps ensuring reliable and efficient energy systems for a sustainable future.

By leveraging our comprehensive portfolio of products and solutions, our know-how and our expertise, we help our customers to master the transition to a more sustainable and efficient energy future.

Energy transition in action with energy products and solutions

Select your product or solution:

Blue high-voltage products	›
Circuit breakers	›
Compressors	›
Digital Solutions (Omnivise Portfolio)	›
Disconnectors and earthing switches	›
Flexible AC transmission systems (FACTS) solutions for reliability	›
Gas-insulated switchgear	›
Gas Turbines	›
Generators	›
Green hydrogen production	›

Duke Energy: The world's most powerful natural gas power plant

Highly efficient and flexible gas

A lot of organized information

Artificial Portfolio Expert Goal

Build and present a model that understands the websites, associated, documents, and general engineering knowledge.

Portfolio Assistant: Create an agent capable of receiving and understanding relevant industrial products, and services, and what problems they can help solve.

Agent is tasked to answer relevant technical and conceptual questions about products and services, with special tailoring by industry, and use case. Agent should be able to converse at different levels of technical detail & proficiency, from curious children to expert level professionals without misrepresentation.

Artificial Portfolio Expert Goal

Agent should reference source material point to appropriate source material; and direct to an appropriate publicly listed contact when needed.

Agent should focus extensively on publicly available data, and other general and trustworthy sources (e.g. Relevant curated Wikipedia pages to answer questions about the function of a turbine or switchgear.).
